

Domestic US and Trans-Border Fuel Surcharge:

There are two scales for calculating FSC: "Premium" and "Deferred". All shipments will be subject to a USD \$7.50 minimum on FSC.

Premium:

The Premium FSC index will be applied to all Next Flight Out, Priority Overnight and Next Day Regular shipments traveling within the 48 contiguous states. It will apply to *all air service levels* traveling to/from AK, HI and PR. The Premium scale will be based on the Department of Energy US Gulf Coast spot price for Jet Fuel.

The Premium FSC shall be determined by reference to Department of Energy US Gulf Coast Jet Fuel weekly spot price report by the Energy Information Administration (EIA) agency of the United States Department of Energy. The DOE US Gulf Coast Jet Fuel weekly report can be viewed at:

http://www.eia.gov/dnav/pet/pet_pri_spt_s1_w.htm

The FSC shall be determined Tuesday of each week and applied using the US Gulf Coast Jet Fuel average price, with each week's FSC in effect for all shipments tendered from Monday the following week at 00:00 through the following Sunday at 23:59 Eastern Time.

Deferred:

The Deferred FSC index will be applied to 2ND Day and all services beyond (3RD, 4TH, 5TH, etc.), Local Cartage, Truckload, LTL and Economy services within the 48 contiguous states as well as any Domestic LCL to/from AK, HI and PR. The Deferred scale will be based on the Department of Energy National Average On-Highway US Diesel retail price.

The Deferred FSC shall be determined by reference to the Weekly Retail On-Highway Diesel Prices report (DOE Diesel Report) by the Energy Information Administration (EIA) agency of the United States Department of Energy. The DOE Diesel Report can be viewed at:

<http://tonto.eia.doe.gov/oog/info/wohdp/diesel.asp> . The FSC shall be determined Tuesday of each week and applied using the DOE Diesel Report's national average price (DOE Price), with each week's FSC in effect for all shipments tendered from Monday the following week at 00:00 through the following Sunday at 23:59 Eastern Time.

West Coast Uplift:

West Coast Uplift is based on the differential between West Coast and National diesel prices. When the differential is greater than \$0.19 per gallon for four consecutive weeks, the uplift is initiated. When West Coast Diesel falls within \$0.19 per gallon of US Diesel for four consecutive weeks, CEVA will eliminate the temporary West Coast uplift.

For each week the West Coast Uplift differential will be difference between the average of the weekly National diesel prices and the average of the West Coast diesel prices from the previous Tuesday as published at: <http://tonto.eia.doe.gov/oog/info/wohdp/diesel.asp>

The differential will be used to calculate the applicable Uplift rate by referencing the attached CEVA West Coast Uplift Index. The applicable Uplift rate will be effective on Monday at 00:00 through the following Sunday at 23:59 Eastern Time

The uplift will be applicable to deferred services only, and is applicable to freight moving into, out of and within the five western states of California, Arizona, Nevada, Oregon and Washington.
