To Our Valued Customers:

RE: U.S. Domestic and North America Trans-Border Fuel Surcharge – May 17, 2022

For the calculation of fuel surcharges, the average DOE USGC jet fuel price was USD 4.266 per gallon, DOE weekly on-highway national diesel fuel price was USD 5.613 per gallon, and DOE weekly on-highway West Coast diesel fuel price was USD 6.075 per gallon. Therefore, the following fuel surcharges, subject to a minimum of USD 7.50 per shipment, will apply for the period 05/23/2022 – 05/29/2022

For week 05/23/22 - 05/29/22	
Premium	46.60%
Deferred - West Coast	54.00%
Deferred	49.00%

*Includes all services to/from Alaska and Puerto Rico, except LCL ocean freight.

**Into, out of, and within California, Arizona, Nevada, Oregon and Washington

Fuel surcharges are based on the attached CEVA Premium, Deferred, and West Coast Uplift FSC scales and the average of fuelmarket prices from the previous Tuesday for application during the following Monday.

Premium FSC applies to all Same Day and Next Day shipments and all services to/from Alaska and Puerto Rico, excluding LCL ocean freight, based on the U.S. Department of Energy Gulf Coast jet fuel spot market published at http://www.eia.gov/dnav/pet/pet_pri_spt_s1_w.htm. Air FSC to/from Hawaii will fluctuate based on market conditions – contact the involved CEVA office for the most current HI air FSC rate.

Deferred FSC applies to all other Second Day, Economy, Local Cartage, and Truckload shipments, excluding LCL ocean freight to/from Hawaii, Alaska and Puerto Rico, based on the U.S. Department of Energy weekly on-highway national diesel fuel market published at <http://www.eia.gov/petroleum/gasdiesel/>. LCL Ocean FSC to/from Hawaii, Alaska, and Puerto Rico will fluctuate based on market conditions – contact the involved CEVA office for the most current LCL ocean FSC rate.

Deferred West Coast FSC is based on the differential between West Coast and national diesel prices and applies to all non-premium freight moving into, out of and within the five Western states of California, Arizona, Nevada, Oregon and Washington. The U.S. Department of Energy weekly on-highway West Coast diesel fuel market is published at <http://www.eia.gov/petroleum/gasdiesel/>. Per CEVA's West Coast FSC policy the uplift will be suspended. Should West Coast Diesel exceed 0.19 higher than national diesel prices for four consecutive weeks the uplift will be re-activated.

When U.S. Department of Energy USGC jet fuel prices fall below USD 0.42 per gallon and on-highway national diesel prices fall below USD 1.15 per gallon for eight consecutive weeks, CEVA's corresponding fuel surcharges on U.S. Domestic and North America Trans-Border transportation will be eliminated.

We appreciate your business and continued support and are committed to providing you the best value in the market through service excellence and competitive pricing. Please contact your CEVA account representative or service station should you have any questions on these changes.
