

Press Release

CEVA Logistics Supporting SE Asia Customers with New Advanced Warehouse in Philippines

- *New warehouse enhances ability to serve customers in Southeast Asian market, positions CEVA for future growth*
- *Site now open, offering full suite of warehousing services, including multi-channel operations, reverse logistics*
- *Incorporates best practices in employee health and safety, risk control, environmental considerations*

MARSEILLE, FRANCE – June 2, 2022 – CEVA Logistics opened a new facility this week in the Ruhale area of Taguig, Philippines, offering its customers a new warehouse with advanced technology and environmental best practices.

The new 14,000-square-meter facility allows CEVA to better serve existing customers, keeping pace with current demand while also remaining flexible for future capacity needs in the rapidly growing Asia Pacific region.

Designed to meet a wide range of warehousing, logistics needs

The Ruhale warehouse boasts a full suite of warehousing and logistics services for customers across a range of industries, including electronics and food and beverage. The facility features ambient, temperature-controlled and dangerous goods storage, 13 loading bays, floor staging and an optimized shelving configuration that can accommodate up to 16,000 pallet positions.

Currently employing approximately 50 people, the warehouse offers customers a full range of warehousing, distribution and value-added services, including picking and packing, labelling, bundling, re-work, tax stamping and digital bottle printing. The CEVA team can also manage return and reverse logistics and integrated B2B and B2C omni-channel operations.

The site was chosen based on its proximity to Manila's city center, as well as for its easy access to major transportation hubs, including Manila's international and domestic airports and seaports, and to major highways for ground transport options.

Meeting the needs of today with an eye on the future

In addition to meeting anticipated regional capacity needs, the Ruhale warehouse was also built with an eye on the future in terms of adopting warehouse innovations. Employing state-of-art technology to improve both employee health and safety and risk management, the warehouse also incorporates best practices in waste management and energy conservation to improve the facility's carbon footprint and environmental impact. To optimize productivity, digital lean dashboards have also been implemented. Planned future enhancements include

the use of wearable device scanners, drones for stock-taking and cleaning robots for facility maintenance.

Elaine Low, managing director of Southeast Asia and Pacific, CEVA Logistics, **said, “I am very proud of the team’s expansion in the Philippines, and I am confident this strategic investment in one of Southeast Asia’s more vibrant markets will be the start of many more successful ventures as we continue to support customers’ supply chains with responsive logistics solutions.”**
