

BUSINESS ALERT

CEVA LOGISTICS NORTH AMERICA

SEPTEMBER 15, 2022

CEVA Ground Peak Season Surcharge

Dear Valued Partner,

The transportation industry continues to be challenged by driver shortages, supply chain variability, labor shortages, and inflation.

Driver pay has reached historic levels, and warehouse and transportation labor as well as capital equipment costs have risen nearly double digit.

To support these increasing costs and continued challenges, CEVA will implement a peak season surcharge of \$17.00 USD per shipment to any tendered shipment from October 17, 2022, to January 15, 2023. This surcharge, which is applicable for all customer shipments, will support the flexibility required to meet and protect our customers increased demand during the peak months.

We value your business and look forward to continuing our strong business partnership into 2023.

Should you have any questions please contact your CEVA account representative.

Sincerely,

Robert Bulick

EVP Ground & Rail – North America
